2. Corporation «Agro-oven» is one of the largest agrarian companies in Ukraine. The main office of the corporation in Dnipropetrovs'k plans and coordinates work of numerous productive subdivisions in the four districts of the Dnipropetrovs'k region.

Products:

1) plant-growing (crop sector):

- oilseed crops: sunflower;
- industrial crops: rape;
- cereals: wheat, corn, barley, pea;

2) livestock sector:

pig breeding:

- in living weight: the pedigree animals (F-1, KB of dark), landras, dark, white Ukrainian, Hungarian

- in for slaughter weight: pork meat, cut, by-product, cattle, in living weight, pedigree breeds: white Ukrainian, red agviten, grey Ukrainian;

3) poultry farming: chickens broilers of 1st category, chickens broilers of 2nd category, filet, chicken breast, fourth back, ham, thigh, shin, wing.

4) minced chicken: meat of bird of the mechanical deboning, minced chicken delicacy, stuffing chicken special, stuffing chicken peasant, stuffing chicken classic, stuffing chicken domestic.

Stuffing chicken semi-finished, stuffing chicken sausage.

5) potato growing: seed group: of Amoroza, Bellarozza, Venata, Empala, Koleta, Condor, Kuroda, Laura, Marlen, Marfona, Pikasso, Rokko, Romanno, Cante.

Commodity group: packing 20-25 kg, packing (PE package) 2,5 kg, packing (net) of 2 kg.

5. The Privet Enterprise «Agroservicetractor» is the domestic producer of the **motocultivator «Dnipro-6R»**.

The Privet Enterprise «Agroservicetractor» produces the Motoblock «Dnipro-6R», in which is worked out and inculcated on all complex of agrotechnical works and a number of the fundamentally new patented decisions are taken into account. Besides a number of innovative decisions, reliable kinematics chart, American four-stroke petrol engine «Briggs & Stratton» (power of 6 hp), the main dignity of motoblock «Dnipro-6R» is an amount of executable operations, due to what he excels all Ukrainian analogues, both imported and of national production.

By means of complete set of additional devices, «Dnipro-6R» successfully gets along at such works, as ploughing and cultivating of soil, planting of vegetable cultures by vacuum precision planter, planting of tubers by potato-planter of new construction, earthing up, sprinkling of the field and digging root crops, mowing of

herbares, snow cleaning and transporting of loads. As a stationary setting «Dnipro-6R» can be transformed in a corn-crusher, feed crushing machine or shredder.

The Privet Enterprise «Agroservistraktor» mastered release of a exact seeding vacuum seeder of SVTV 4-8. This novelty has no analogs and provides exact multirow seeding of seeds of various cultures (4-8 rows). Specified seeder can work with any motor-block or mini-tractor.

Price of a seeder of SVTV 4-8 at 10-15 time below in comparison with european seeders with the same possibilities.

In 2011 the enterprise let out an experimental batch of such seeders of SVTV 4-8 which showed excellent results in seeding of small vegetable seeds, bean and other cultures.

In farms of many regions of Ukraine by means of a seeder of SVTV 4-8 were sowed such cultures as carrots, radish, onions, cabbage, beet, haricot, cucumber etc.

Productivity of specified seeder: 2500-3000 square meters per hour.
