

## Machine building

1. «ICE «Kran-Servis» llc. is a leader on the market of manufactures of handling equipment and control systems of cranes in Ukraine.

Company looks for the new partners on this stage of development. Company is interested in possibility of partnership with the distributor and representatives. All commercial partners will have dealer's discount agreed with both sides.

When company proposes the partnership it expects to acquire new partner this way it get an opportunity to receive the quality equipment at bargain price.

### ***Range of products:***

- bridge cranes type KME and bridge cranes special type KMEST (magnetic, grab, with a movable crosshead, for transporting the molten metal) lifting capacity up to 32 t. span up to 35 m;
- bridge single beam – overhead lifting capacity till 20 t. span up to 15 m; bearing lifting capacity till 20 t. span up to 28,5 m;
- gantry cranes, portal lifting capacity up to 50 t., span up to 42 m;
- jib crane with the swimming arm on the column, wall cranes lifting capacity up to 10 t. boom radius up to 10 m;
- electric chain hoists lifting capacity up o 5 t., rope hoist up to 50 t., manulifty lifting capacity up to 250 kg, winches;
- control cabin of cranes, chair-control, seats for the crane operator, remote control of crane;
- spare parts and accessories to bridge, gantry, portal cranes, non-stop service, warranty and post warranty service.

Company has all necessary permits for works in Ukraine, Belarus, Russia and other countries. All products have the certification in the systems UkrSepro, GOST R, Bel ST.

2. **State Enterprise «Production Association Yuzhny Machine-Building Plant named after A. Makarov» (hereinafter - YUZHMAH)** – is one of the world's scientific and industrial complexes, involved in serial production of modern rocketry. Many of them are the embodiment of scientific development, that doesn't have analogs of the conception and the execution in the whole world. Over 65 years four-generation of carrier rockets (CR) and several types of spacecraft have been creating. And it is currently creating the fifth generation of the CRs and the new generation of the spacecrafts. YUZHMAH made an ecological two-stage CR under the title «Zenit» to realize the world-known international «Sea Launch» project. According to the project program more than two scores of CRs were launched in the Pacific from a specially designed floating platform and a few scores of the satellites from different countries (Russia, USA, etc.) were put into the Earth orbit. Purposely to launch these CRs from the «Baikonur» cosmodrome a

joint venture «Land Launch» has been set up. Owing to YUZHMAH's successes in space exploration, Ukraine deservedly consolidated its status of a world space power.

YUZHMAH with 11% of the worldwide launches can claim to be one of the five leading rocket and space enterprises. Created by decades the industrial base, coupled with high-technology allows YUZHMAH to produce a wide range of other types of industrial products: trolleys, tractors, landing gears, wind-electric sets, etc.

YUZHMAH's team is interested in expanding cooperation with companies of the international space and other programs. YUZHMAH carries out foreign economic activity in 23 countries, is in the constant search for partners and is willing to consider cooperation and partnership proposals.

***Main production:***

- space and aviation: spacecraft; launchers; undercarriage assemblies; rocket engines; high pressure balloons;

- electric transport;

- wind-power engineering.

**3. Turbine Plant of Krivoy Rog «Constar» PJSC** is one of the leaders of machine-building industry of Ukraine. For more than 30-year-experience on market of gas turbine equipment enterprise has produced nearly 600 gas-pumping units designed for compression of natural gas at the compressor stations of the CIS trunk pipelines. Gas turbines and driven engines manufactured by «Constar» have won reputation of unpretentious and reliable for exploitation. The enterprise developed wide scale of modernization works and overhauls of gas turbine equipment and aftersale services.

Apart of its main specialization, company manufactures broad production range for oil-and-gas industry, machine-building, metallurgical and chemistry branches of industry. In view of today's deficiency in natural resources our enterprise pays its main attention to manufacture and integration of energy-saving technologies. Turbine expansion units and steam turbines, produced at the enterprise, are successfully exploited in Ukraine, Byelorussia and Uzbekistan. Using its technical capabilities, company also produces assemblies and components for gas turbine equipment: casing parts, blades, compressor and turbine wheels and disks.

**5. «Yuzhnoye» SDO** is a powerful design company which in cooperation with its partners provides turnkey developments for complicated high-tech projects.

The main directions of the Yuzhnoye's activities remain works associated with creation and operation of the space-rocket technology. Launch vehicles, spacecraft and rocket engines developed by Yuzhnoye meet the highest criteria of the modern science.

Recent years, taking into account vital society's needs some conversion lines of activities have been developing. These lines are:

- creation of technology for power engineering including renewable energy sources;

- creation of some transport systems;

- creation of agricultural machinery.

**6. Main directions of activity of «Obshchemashkontrakt» JSC IBC** are supplying with of next groups of equipment: a vent equipment; ion-exchange filter for cleaning air from toxic gases and steams, aerosols of acids, lyes and salts; industrial filters for cleaning of air; boring equipment; pumps and pumping asms; electric motors to the pumps; plate-type heat exchanger of A and thermal points on their basis; spiral compressors; systems of waste water treatment.

Long-term collaboration with the largest producers, and also presence of own acquisition base, allows high-quality and in the shortest time to carry out complex deliveries of equipment and materials of any complication on the enterprises of different branches of industry.

web-site: [www.omk.dp.ua](http://www.omk.dp.ua)

**7. «Promarmatura» JSC** is the leading armature enterprises of Ukraine, specialized in the manufacturing and complex deliveries of industrial pipeline valves.

The enterprise has wide nomenclature of production such as common industrial ones: gate valves, stop-cocks, steam traps, stop-control armature; and special ones, made of usual and corrosion-proof marks of steel, cast-iron, brass, in a big range of diameters, pressure, temperatures and working environments. Besides, based on the specifications of customers there are annually developed and made unical armatures for special conditions of operations.

A new direction in the activity of the company - services of the bonded warehouse pertinent.

**9. «Dneproshina» JSC** is one of the biggest tyre manufacturer from Ukraine.

Company produces tyres for mining, constructive vehicles, tractors, harvesters, buses, trolleybuses, fork loaders, passenger and truck cars.

Company works stable due to the successful experience of long-term cooperation with our partners from more than 30 countries all over the world, due to good knowledge of international tire market demands and perspectives of development, due to the high standards of product manufacturing, and also due to the internal developing and inner growth of the staff in reply to our customers requirements.

**11. Machine-building plant «DUCO-TECHNIK»** is German-Ukrainian enterprise, which was founded in 1995.

**The enterprise «DUCO-TECHNIK»** is developing its activity intensively on the following main directions: production of the equipment for meat processing industry; technological designing; construction and commissioning of slaughtering and meat processing workshops; engineering.

The equipment of the firm «DUCO-TECHNIK», which is manufactured jointly with German partner, firm «MEPROTEC», takes one of the leading positions on the meat processing market and successfully competes with the famous European manufacturers.

The equipment of «DUCO-TECHNIK» is exported onto the markets of near and distant foreign countries - Russia, Belarus, Moldova, Germany, Australia, Chile, RSA (South Africa), Serbia and Montenegro.

Today, the company «DUCO-TECHNIK» offers and realizes the complex large scale program which includes the various services range, that is:

- manufacture, selection and delivery of equipment;
- installation, commissioning and training of Customer's personnel; □
- planning, designing of new and reconstruction of existing enterprises (license N 051810);
- service, warranty and post-warranty maintenance;
- technical and technological consultations.

**12. «New Technologies» Ltd.** – producer of hydrocyclone and industrial rubber pipeline systems.

An application of our equipment domain includes enterprises mountain, coal, metallurgical, chemical and other areas of industry.

Company produces: hydrocyclone and their complete; batteries of hydrocyclone; industrial rubber pipelines; hose breech-blocks; lining-up of pumps by wearproof polymeric materials; repair of ore mining and processing equipment.

**13. «Dizelnyy zavod» JSC** is producer of qualitative substandard machine for enterprises of heavy industry. The plant mastered producing of freight wagons – dump car, 2BC-105, cars for steel pellets, wagon of type 12-9790.

Main production: producing of rail freight cars: Gondola car (12-9790); Dump-car 2BC-105; Hopper car 20-480; other cars.

Technical possibility allows to produce the following type of wagons (producing and repairing): dump-car, types 2BC-105; 6BC-60; 6BC-66; Hopper. type. 20-480; 20-471; hopper-batcher, type 55-76; wagon for cooled coke. 22-4070; gondola car type. 12-100; 12-532; 12-1505 and others; plate wagon.

Producing of spare parts for freight cars: wagon frame for dump-car 2BC-105; wagon body for dump-car 2BC-105; top frame for dump-car 2BC-105; unloading mechanism for dump-car 2BC-105; walls of wagon body of dump-car 2BC-105.

**14. The Dnipropetrovsk plant of dedicated tool of calibers of «TehnoProgress» PE** is a producer of dedicated tool on State Standard and drafts of customer.

Basic products: complete set and screw-thread rings, screw-thread corks, control corks, screw-thread corks working, smooth corks, one inch, pipe rings and corks, smooth rings are standard (for tuning of hole-gauges), cone corks and hobs, sine blocks, triangles, measuring tool adaptations of enhanceable exactness. An enterprise makes templates, staples, french curves and not for verification of diameters, special control adaptations also.

Companies supplies under an order according to State Standard instrumentation, cutting a hard-alloy instrument (drills, milling cutters, involutes).

All products, made on enterprise, are accompanied by testifying to calibration, metrology of Ukraine accredited by the Central institute, an own laboratory.

e-mail: tehnoprogress@ukr.net

**15. «DAfmi »** is the biggest manufacturer of the brake system components in CIS. At first the structure was joint as Ukrainian-Australian venture DAfmi on the basis of Yuzhny Machine-Building Plant. From 2005 the company has been continuing its activities as a separate legal entity.

***Main production:***

1) elements of DAFMI braking system are presents in a wide range of: more than 400 code names of disk and drum brakes, 220 types of the brake hoses for 2000 models of cars, brake discs;

2) special friction products for metalworking, forge-and-press and carrying-and-lifting equipment are manufactured at the company. It`s produced disc brake pads for trucks and semi-trailers.

***Supply proposition:***

1) delivery of brake pads for Tavria and Slavuta cars and ZAZ Lanos, known as Chevrolet Lanos in Russia (ZAZ, city of Zaporozhye, Ukraine), to the conveyor and service centers;

2) DAFmi`s brake hoses are shipped to the assembly conveyor (OE) and to the service net of the Tavria and Slavuta of the Zaporozhye Car Factory\$

3) regular delivery of company`s products for auto spares market (AM) to Russian, Georgia, Kazakhstan, Moldova, Bulgaria, as well as some countries of the Middle East and Latin America.

***Quality.***

- Brake pad are testing on our own chassis dynamometer simulating the real operational conditions.
- Quality control system certified according to the requirement of international standard ISO 9001: 2008.
- Complete incoming control of raw materials and finished product outgoing inspection as well as the analysis of applied materials` characteristics using the facilities of our own laboratory.
- All products are certified in Russia and Ukraine.

***Technologies.*** Application of European equipment for mixing and brake pad molding as well as application of modern imported equipment for brake hose assemblage. Application of powder painting and ink-jet marking.

Owing to high quality of company`s products its trademark is well-known DAFmi not only in CIS countries, but also abroad.
